Avi and Owen (I think it is Owen) of WaterGen are onsite now. Not sure of their schedule. I have to leave for Center Hill shortly and John Hall is taking over escort duties when I leave.

Somebody else will need to be the responsible Fed on Monday if they are here because I will be busy dealing with hazardous waste shipments from AWBERC and Center Hill. I can be at T&E on Tuesday starting around noon. I will also see if Aptim employees can be their escort. I'll talk to JR Smith or Franz Ott this afternoon assuming they are in the office. Other than that, the machine is up and running and appears ready to go.
